

Assistant professor in the field of quantitative methods in social sciences

JOB DESCRIPTION

Research work and teaching undergraduate and graduate courses in the field of quantitative methods in social sciences or in a related field.

DESIRED SKILLS AND EXPERIENCE

Ph.D in a related field is required as well as a significant record of teaching and research excellence.

ABOUT THE EMPLOYER

School of Advanced Social Studies is independent research-oriented higher education institution in the field of social sciences, located in Nova Gorica (Slovenia), on the western border of Slovenia with Italy, and close to both Austria and Croatia.

The School's strategic vision and thematic focus on high-level applied research in specific areas of EU studies is shaped, first, by the intercultural space in which it is located, secondly, by the transnational character of the region, which has traditionally nurtured strong cross-border linkages and, finally, by the region's successful, smart and inclusive transformation from traditional industrial and rural region to one with high value-added industry and tourism, in which knowledge played the key role.

The activities of the School are guided by strategic orientations towards interdisciplinary, internationalisation, excellence and applicability in teaching and research. During the short period after its founding in 2006, the School has managed to attract and consolidate a highly qualified and ambitious team of mostly younger researchers and university teachers. In terms of measurable scientific achievements, this is currently one of leading social science institution in Slovenia. SASS has full accreditation for BA and MA courses as well as for doctoral studies in Sociology.

SASS is providing degree-awarding courses at undergraduate, masters and Ph.D level in social sciences and in psychosocial counselling.

SASS is not only internationally connected leading national centre of excellent social science education and research, it is also strongly embedded in local, regional and national environment by conducting high-level basic research and relevant applied research for businesses and public administrations at local and national levels.

Although it is a HEI, it strongly depends on revenues from research and various EU-funded projects. SASS has traditionally received majority of its funding on a project basis and has extensive experience with management and implementation of EU co-financed projects.

SASS has extensive experience with management and implementation of EU co-financed projects. SASS is embedded in relevant international research networks, and it is hosting the National Committee of the UNESCO-sponsored programme, "Management of Social Transformations" (MOST2).
